## EDUCATION

Rowan University	(September 2019 - May 2021)
B.S. Computer Science	GPA 3.9
<ul style="list-style-type: none"><li>• Summa Cum Laude</li><li>• Concentration in Software Engineering</li><li>• Member of Upsilon Pi Epsilon Honor Society</li><li>• President's Scholar of Excellence (Spring 2020 - Spring 2021)</li></ul>	

## PROJECTS

PengBeats	(January 2021 - May 2021)
A Spotify mockup utilizing the Django framework that provides music recommendations based on a survey and social feed interactions (i.e. likes and dislikes). Focused mainly on front-end components and working with the Spotify Web API.	

SecuritE-mail	(September 2020 - December 2020)
A Microsoft Outlook plug-in that scans your email for sensitive/classified information, which is stored inside a database, and outputs a score/level of riskiness. Focused on the front-end components, such as working with NodeJS and ExpressJS. This project was developed by ASRC Federal Mission Solutions.	

## WORK EXPERIENCE

Rowan University	(January 2020 - May 2021)
<ul style="list-style-type: none"><li>• Aided students in understanding object-oriented programming concepts</li><li>• Assisted professors with grading and worked closely on personal projects</li><li>• Concentrated on the importance of object-oriented programming design/principles</li></ul>
